

HOW TO START A TIMESHARING SERVICE

It starts with the right system, one specifically designed to get a new service bureau up and running fast. The BTI 5000 interactive, multi-user computer system can do just that, to beat those high start-up costs.

At BTI, we've been making timesharing systems for over ten years, so we know how to get you going.

For example, a wide range of tested application programs are readily available, all up and running in service bureaus now.

Choose from general accounting, sales order processing, inventory control, comprehensive billing, college administration, document editing, mailing list management and more.

Of course, you get complete, solid systems documentation for both operators and programmers, including continuing information on software upgrades and program library additions.

Furthermore, you're backed by one of the most advanced service support programs in the industry. Using computer-to-computer service via telephone, we can typically correct 97% of user problems,

either over the phone or by shipping a plug-in part.

Above all, you'll find that the BTI 5000 has all the growth potential your service bureau will need.

To top it off, we've put all our timesharing experience into a book to help you get your service bureau off the ground. For just \$2, it brings you marketing tips, business planning information, financing suggestions and more.

For your copy, and additional information on the BTI 5000, clip and mail the coupon, with your check, today! Do it now and get off to a fast start.
